From Curiosity to Discovery: My Research Journey

Hello, I'm Faezeh Nassajian from Max Planck Institute for software Systems

I studied Financial Engineering at EPFL.

Driven by the question: How can computational methods improve understanding of social systems?

Driven by curiosity, experimentation, and bridging data with human behaviour

Research Interests & Approach

Core focus: Computational Social Science
Example project: How decentralized is Bluesky platform?
Methods: Studying the AT protocol, Bluesky
implementation, network analysis, …
Bridging social science and computer science

Looking Ahead

Future direction: Studying decentralized social media platforms like Mastodon

Philosophy: Research should be ethical, transparent, and community-focused

Let's collaborate and explore new frontiers together!
