Abstract

Large language models (LLMs) have significantly
the field of automated code generation. However,
research gap exists in evaluating social biases
present in the code produced by LLMs. To so
we propose a novel fairness framework, i.e., *S*
and mitigate the social biases of LLM-generated
Specifically, *Solar* can automatically generate
quantitatively uncovering social biases of the
code by LLMs. To quantify the severity of so
generated code, we develop a dataset that cover
to four state-of-the-art LLMs for code generati
ation reveals severe bias in the LLM-generated
the subject LLMs. Furthermore, we explore se
ing strategies for mitigating bias, including Cha
(CoT) prompting, combining positive role-play
prompting and dialogue with *Solar*. Our exper
that dialogue with *Solar* can effectively reduce
LLM-generated code by up to 90%. Last, we
and data publicly available is highly extensi

Political Bias in Large Language Models: A Comparative Analysis of ChatGPT-4, Perplexity, Google Gemini, and Claude

Our Idea

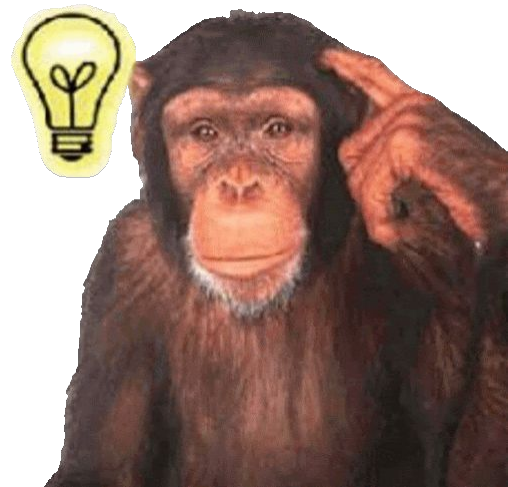

Ambitious Idea:

Which models are more used for which topics?

Which models are more used by which societal group?

What we could do:

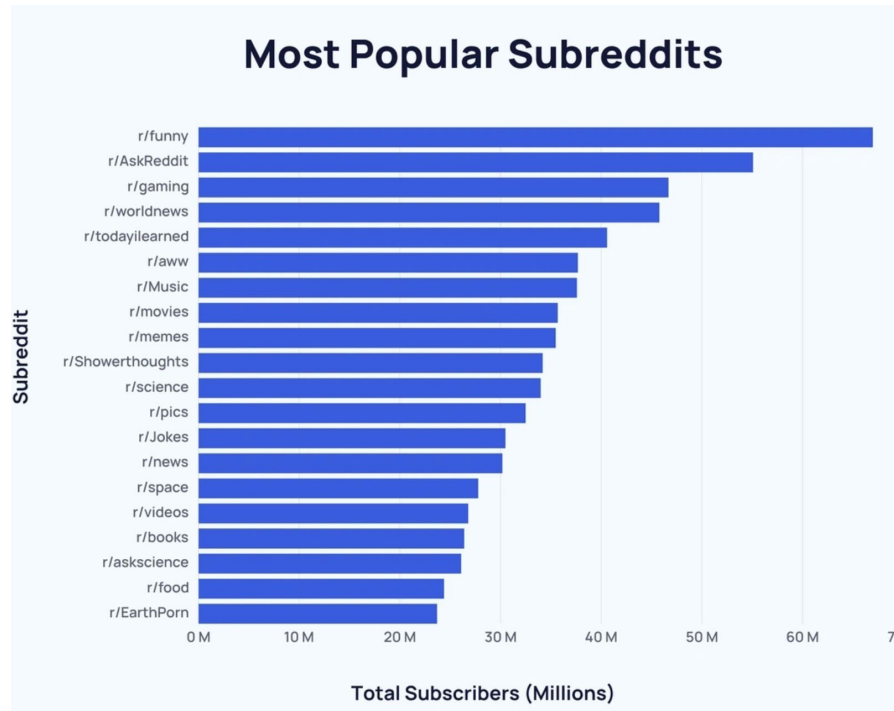

Limit our population to Reddit users

Reddit User Demographics

- 500M users^[1]
- Age group:
 - 31% between 18 to 29
 - 43% between 30 to 49
- 60% are male
- More popular in US (50%), UK, India

[1] <https://explodingtopics.com/blog/reddit-users>

Data Collection (phase 1)

- Arctic Shift download tool
- All posts since 2025-08-01 to 2025-09-16 from:
 - r/ChatGPT
 - r/ClaudAI
 - r/Bard(Gemini)

Data Collection (phase 2)

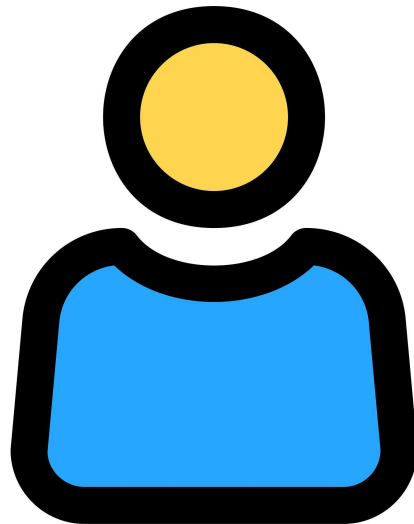

- **Arctic Shift API**
- All posts from all users who has posted in mentioned subreddits in the same time period
- For each user: In which subreddits they have been active?

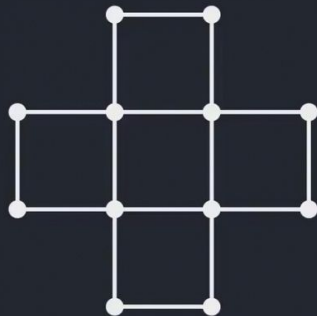

What to analyse?

- Users
- Subreddits

User based network

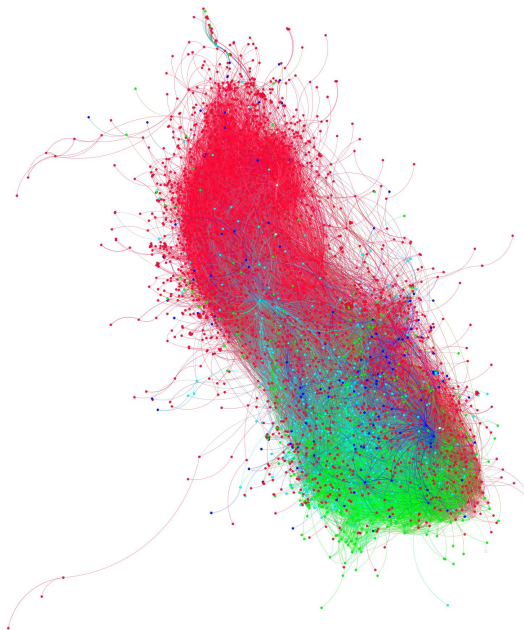

- Nodes: users
- Edge weight: number of common subreddits (Ignore mentioned subreddits)
- Too large to analyse ($|N| \sim 18,000$, $|E| \sim 4,600,000$)
 - Remove edges with weight ≤ 3
 - Remove nodes with 0 degree

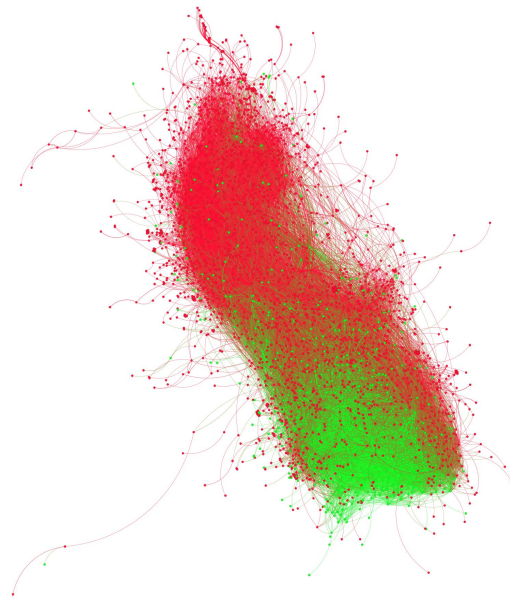

Result network

- GPT
- Bard(Gemini)
- ClaudAI
- More than 1

Is a programmer?

- NO
- YES

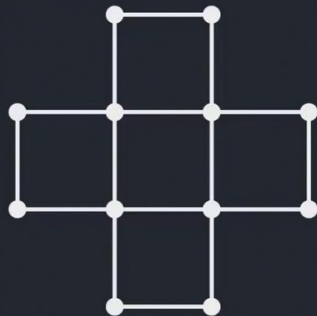

What to analyse?

- Users
- Subreddits

Subreddit based Network

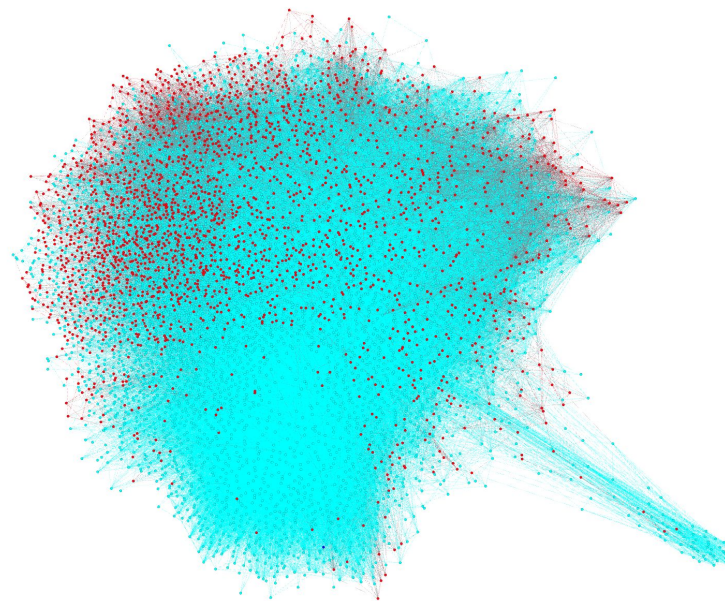

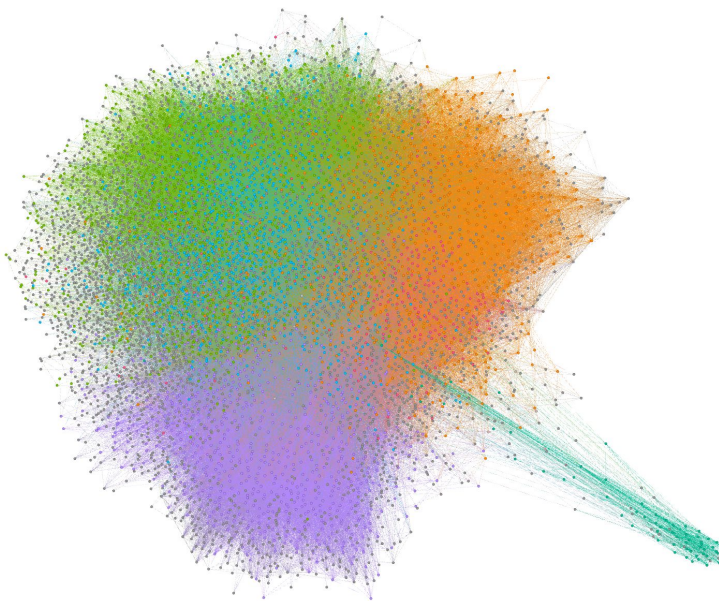

- Nodes: subreddits
- Edge weight: # users posted on v_1 and v_2
- Too large to analyse ($|N| \sim 8400$, $|E| \sim 820,000$)
 - Remove edges with weight ≤ 3
 - Remove nodes with degree ≤ 2

Subreddit Network

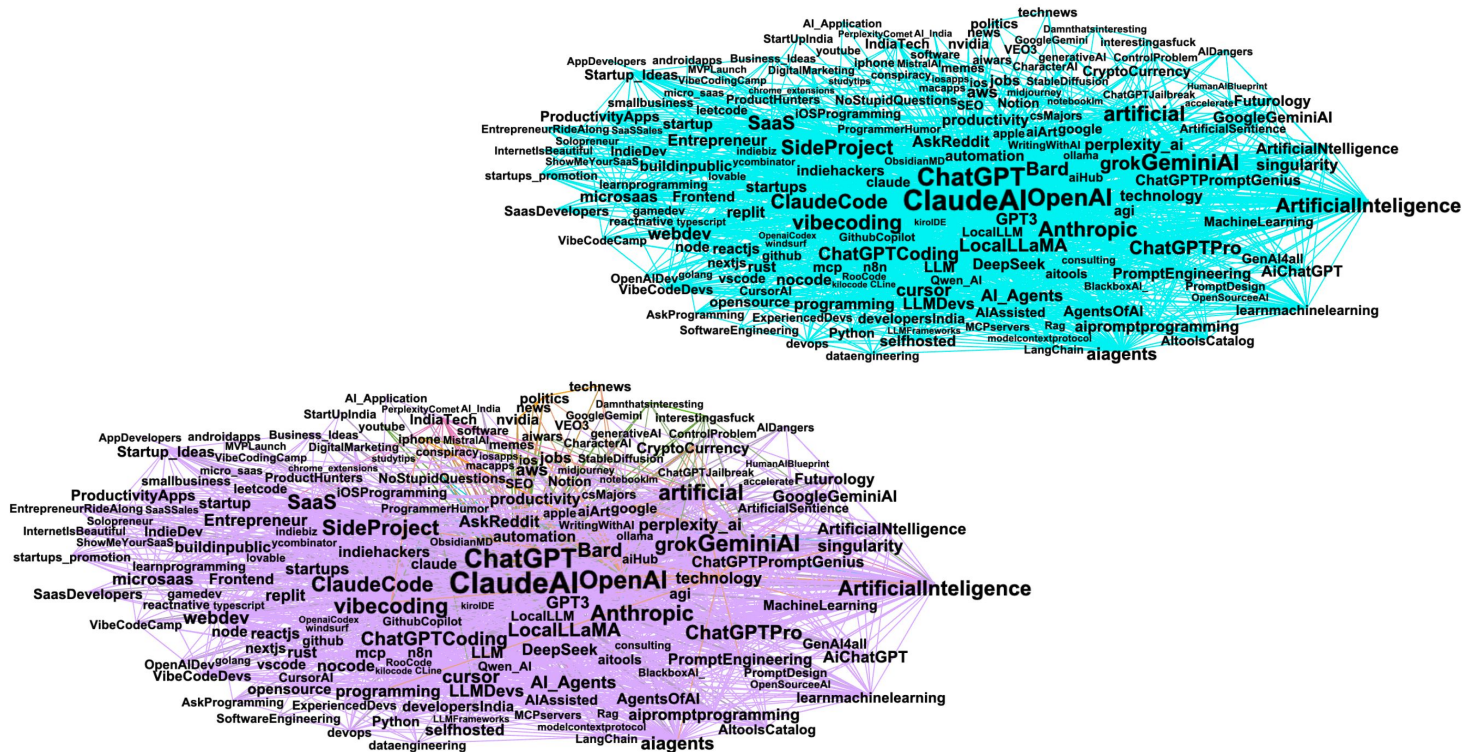

- GPT
- Bard(Gemini)
- ClaudAI
- More than 1

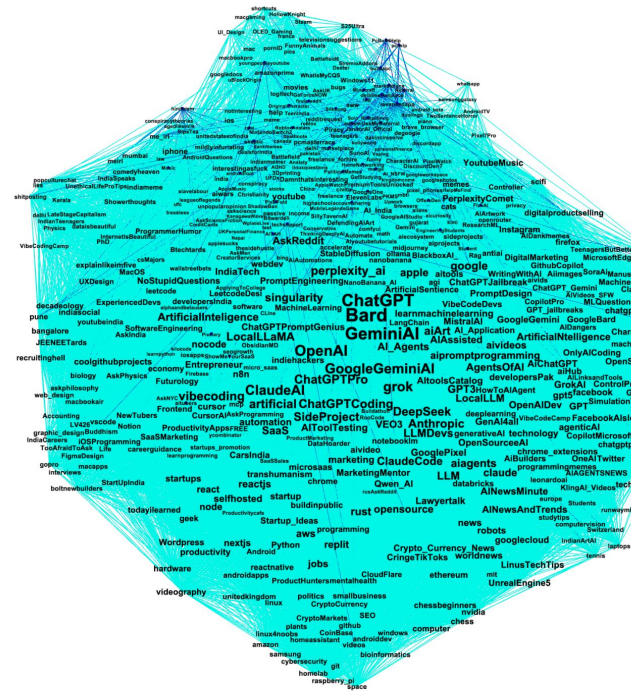

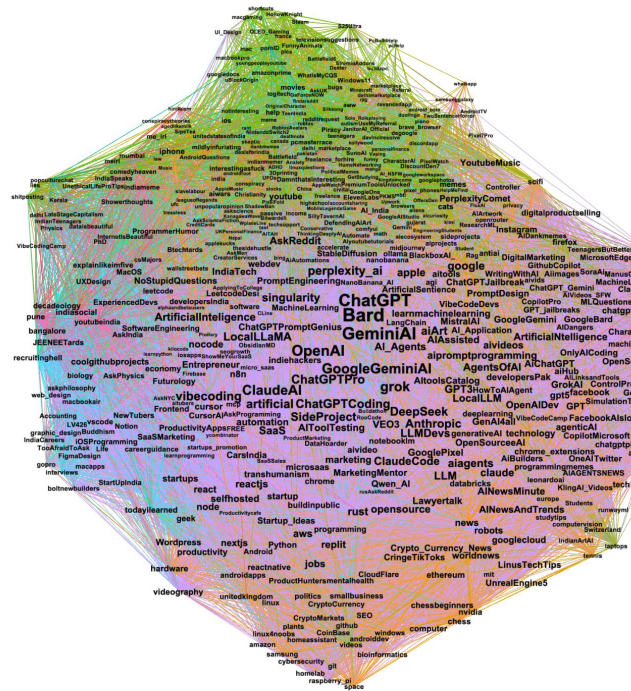

- Game/Comics
- News/Politics
- Technology
- LifeStyle
- NSFW
- India
- others

- Game/Comics
- News/Politics
- Technology
- LifeStyle
- NSFW
- India
- others

- GPT
- Bard(Gemini)
- ClaudeAI
- More than 1

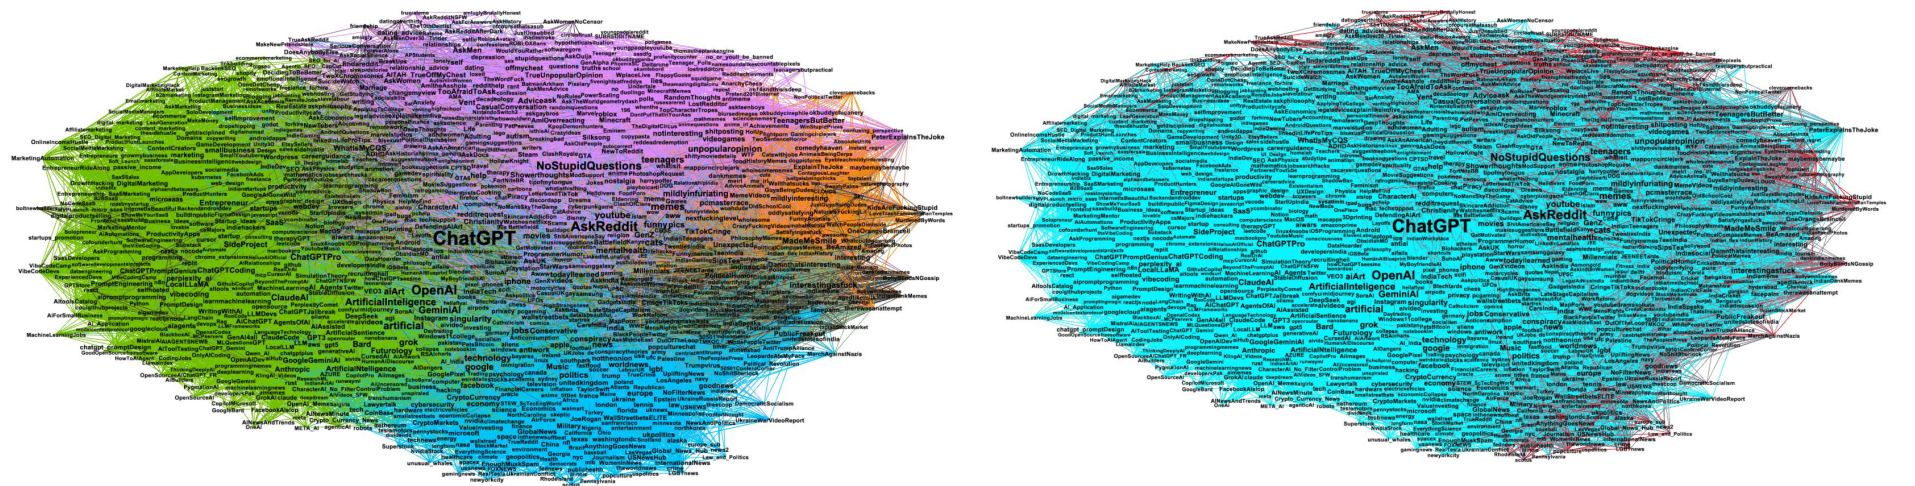

- Game/Comics
- News/Politics
- Technology
- LifeStyle
- NSFW
- India
- others

ChatGPT Network

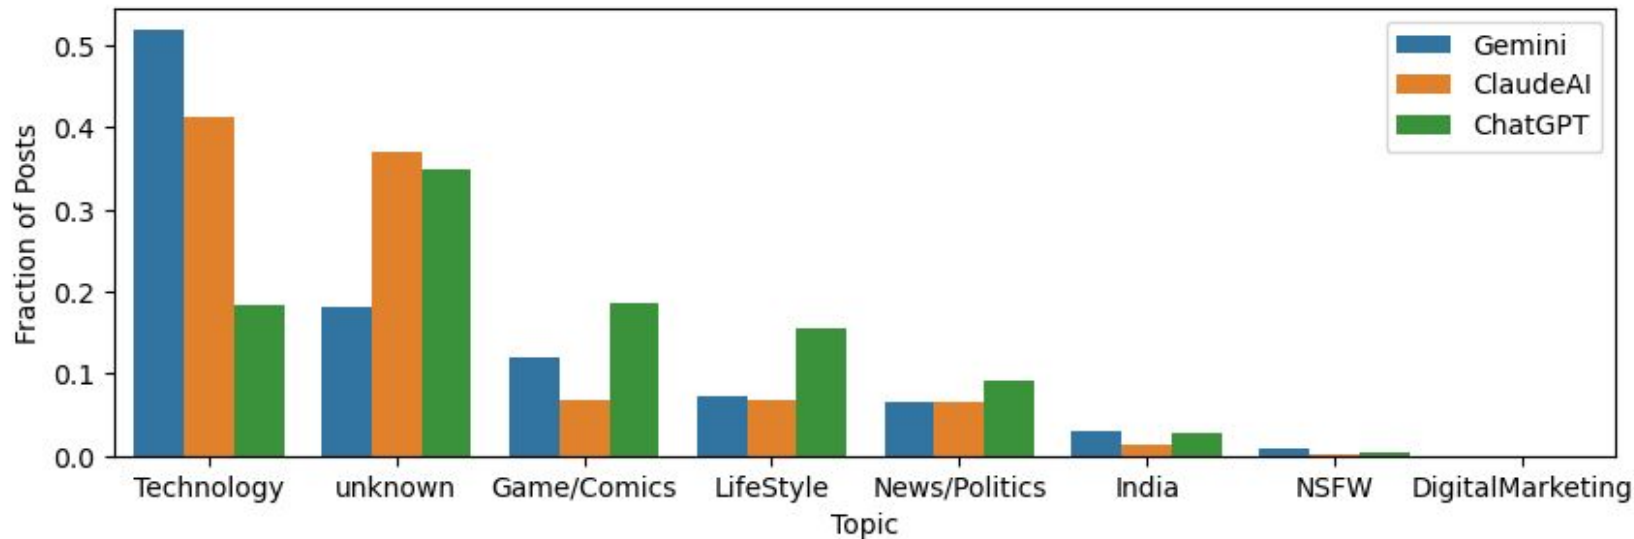

- Game/Comics
- News/Politics
- Technology
- LifeStyle
- NSFW
- India

- GPT
- Bard(Gemini)
- ClaudAI
- More than 1

Popularity of Topics per AI Model

Limitations and Future Works

- Restricted to Reddit members
- Limited subreddits (one per AI model)
- + Include comments as activity
- + Scalable subreddit/user classification
- + Add temporal aspect to study shifts
