

MIGRATION ASPIRATIONS IN AFRICAN TIKTOK CONTENT

Dreaming Beyond Borders: Analyzing TikTok's Role in Nurse Migration from Ghana to the UK

Ethel Elikem Mensah & Deborah
D.Kanubala

The Statistics

- 69.9% internet penetration in Ghana
- 81% of Ghanaians use TikTok
- 1328% increase in nurse migration between 2019-2022

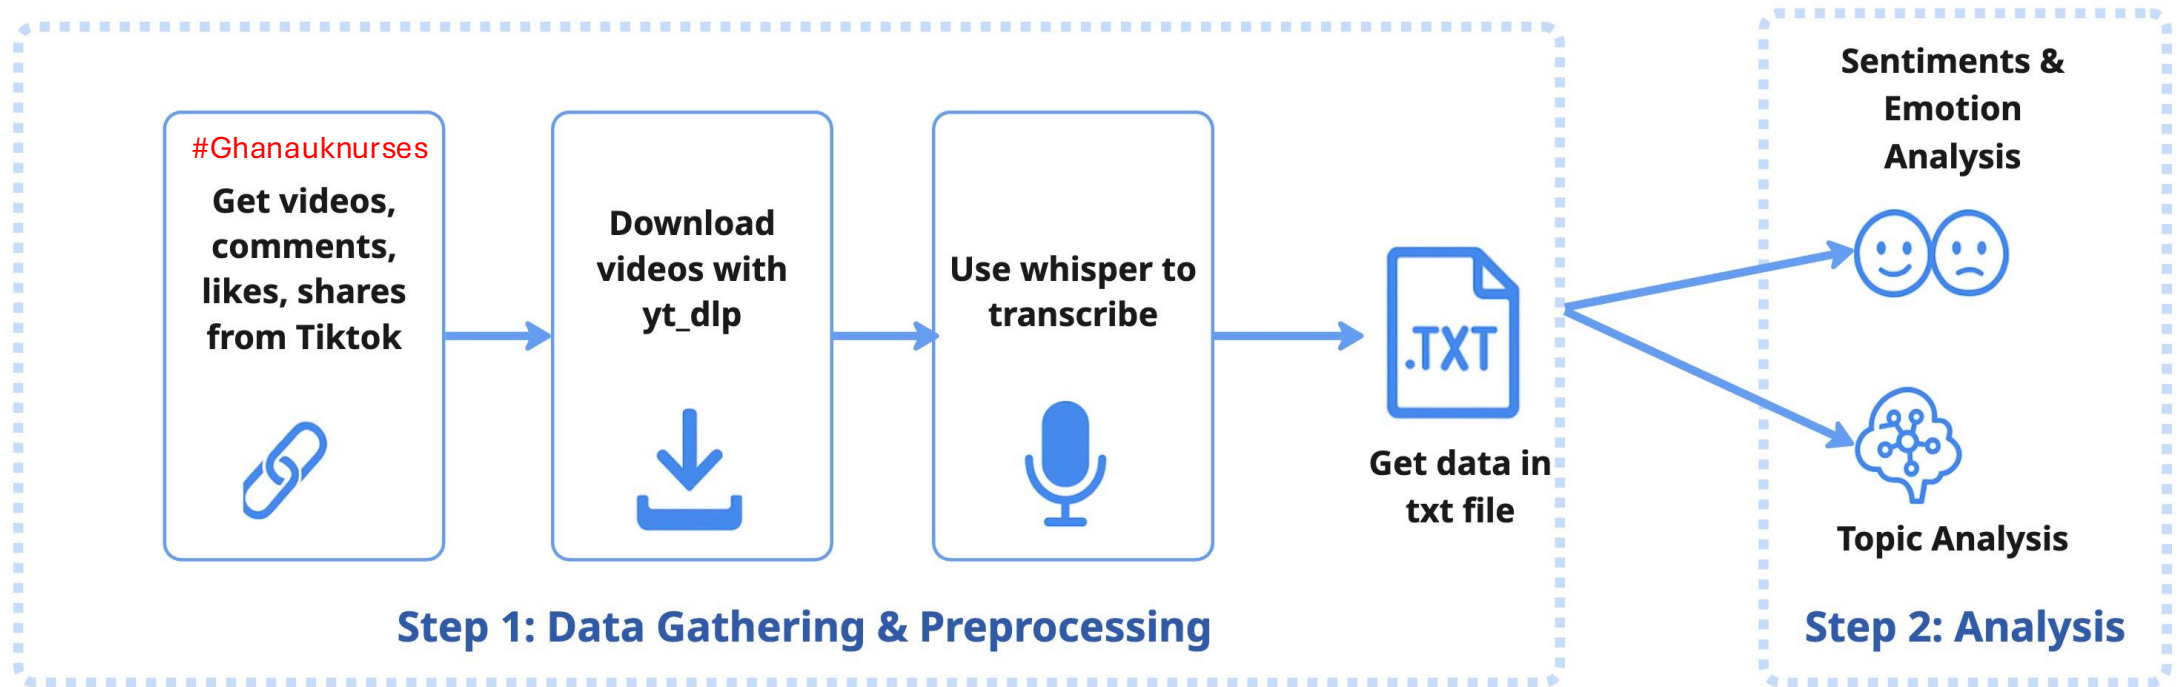

Research Questions

What are the thematic narratives on nurse migration?

What is the overall sentiment and emotions on the topic

Approach

Results & Analysis

Thematic areas that influence migration conversations (Topic 1)

A word cloud featuring various terms related to nursing and healthcare. The most prominent word is 'nurse' in large purple letters. Other visible words include 'clinical' in blue, 'care' in green, 'work' in yellow-green, 'jobs' in teal, 'nmc' in small green letters, 'nursing' in blue, 'research' in green, 'registered' in blue, and 'uk' in large teal letters. The words are arranged in a somewhat circular pattern around the central 'nurse' word.

clinical care
nurse
work jobs nmc nursing
uk research
registered

- **Nursing careers & health work focus**

The topics centered around profession nursing roles particularly within the UK healthcare system. Words like “nmc” (Nursing and midwifery council), registered, jobs, clinical, suggests discussions related to qualifications, job opportunities and regulatory bodies in nursing.

Thematic areas that influence migration conversations

(Topic 2)

- **Sponsorship, Migration & Career Aspirations**

Reflects themes on job sponsorship, immigration pathways and career aspirations for nurses from Ghana. Words like visa, sponsor and IELTS point to the migration process, while company relate to recruiters or organizations involved in this pipeline.

Sentiment Analysis

We used the default model
distilbert-base-uncased-
finetuned-sst-2-English

- A DistilBERT (a lightweight BERT)
- Fine-tuned on the Stanford Sentiment Treebank v2 (SST-2) dataset
- To carry out the the automatic labelling of the sentiments

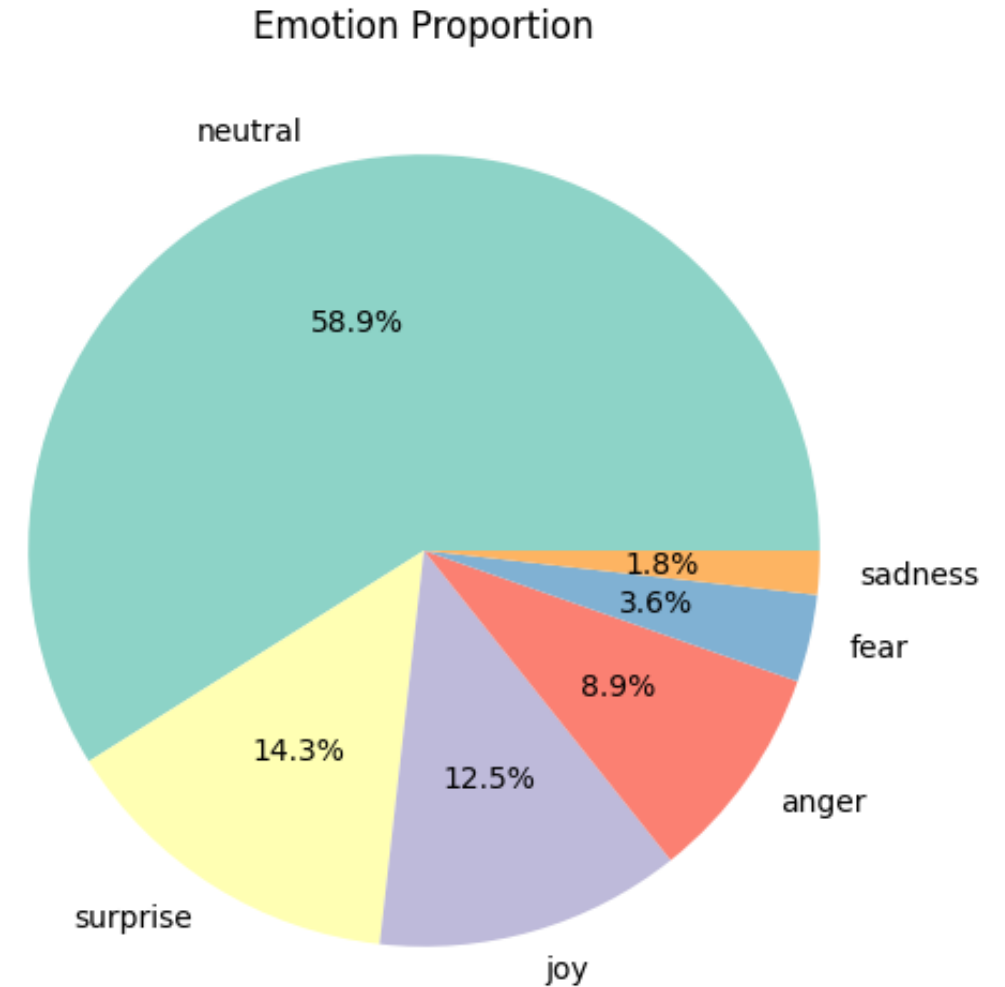

Emotion Analysis

Model details:

- Based on DistilRoBERTa
- Fine-tuned on the Go Emotions datasets (from Google Research)
- Trained to detect 28 emotions

Emotions provide a fine-grained view of how people feel about migrating:

- Joy → Successful migration, offers, visa approval
- Fear or Confusion → Concerns about exams, rejection, scams
- Admiration → Looking up to others who made it
- Sadness → Rejection, challenges, homesickness
